Education

TEK-UP Private Higher School of Technologies and Engineering <i>Engineering Degree in Cybersecurity</i>	2025 – 2028 <i>Ariana, Tunisia</i>
Higher Institute of Information and Communication Technologies (ISTIC) <i>Bachelor of Science in Software Engineering</i>	2021 - 2024 <i>Borj Cedria, Tunis</i>
Sadiki High School <i>High School Diploma in Mathematics</i>	2021 <i>Tunis</i>

Professional Experience

Tunisian Post <i>Seasonal Worker: International Accounting Department</i> - Processed and recorded international financial transactions. - Assisted in reconciling and verifying accounting entries related to international money transfers.	Summer 2023 & Summer 2024 <i>Tunis, Tunisia</i>
PAF — POULINA HOLDING GROUP <i>Observation Internship: Immersion in industry and electrical systems.</i>	January 06 - February 02, 2025 <i>Rades, Tunis</i>
Didousoft — Final Year Project Internship <i>Development of a digital platform for ISET Radès (Vue.js/PHP) with real-time APIs.</i>	February 2024 - May 2024 <i>Tunis</i>
MMS Consulting <i>Development of frontend components using Angular.</i>	July 24 - September 15, 2023 <i>Ariana, Tunis</i>
IEEE Accounting Platform <i>Collaborative frontend/backend team development using NodeJS and NextJS.</i>	July 1st - August 31, 2023 <i>Remote</i>

Projects

AI Project Cyberguard IA Designed a cyber analysis platform under a FastAPI/React architecture, utilizing an autonomous AI agent and RAG engine to automate SOC alert triage with a privacy-first approach.	May 2026
Web Project CyberSentinel-Security-Platform Developed an auto-defensive e-commerce ecosystem. Integrated an intelligent algorithm that computes a user risk score to prevent financial fraud. Designed an admin dashboard featuring real-time log streaming and secure OTP-based account recovery using PHP, JS, MySQL, and Tailwind CSS.	April 2026
Java Project CyberSafe-Kids Created a gamified interactive platform teaching cybersecurity concepts. Built with a clean MVC architecture, an asynchronous network attack simulation engine, and an embedded AI assistant. Leveraged advanced JavaFX animations and JSON formats for dynamic educational content management.	March 2026
Linux Cybersecurity Project Log Security Monitor - Designed a Linux system log analysis tool capable of detecting suspicious login attempts and anomalous activities within /var/log/auth.log files. - Utilized Bash scripting and Linux utilities (grep, awk, sed) to automate analysis workflows and generate actionable security reports tailored for a SOC environment.	February 2026
C Systems Project Linux Process Manager Developed a process manager in C for displaying, searching, and terminating Linux system processes via kernel system calls and /proc file system exploration.	January 2026

- Implemented an interactive command-line interface menu handling PID manipulations, signals management, and direct Linux kernel interaction.

Final Year Project | *Didousoft Platform*

February 28 - May 25, 2023

- Developed a digital platform for ISET Radès, combining a Vue.js frontend with a PHP backend, incorporating API integrations ensuring real-time data processing and optimal performance.

Data Science Project | *VehiScan*

November 2023

- Utilized computer vision techniques and deep learning models to detect vehicles, extract license plate data via OCR, and track movements across video sequences.

Certifications

PCAP — Associate Python Programmer

June 2026

IEEE Involvement

Guest Member — Education Committee, IEEE Vehicular Technology Society

2026 – Present

IEEE Vehicular Technology Society

Global

Student Representative — VTS Tunisia Chapter

2025 – Present

IEEE Tunisia Section

Tunisia

Speaker Coordinator — IASTAM 5.0

2025

Speaker management and coordination operations.

Tunisia

Member — Smart Cities Ad Hoc Communication Committee

2025

Supported strategic communication initiatives for smart city projects.

IEEE

Member — CS Juniors Committee

2025 – Present

Fostering student engagement within Computer Society initiatives.

Tunisia

R8 Representative — IEEE CS Awards Program

2025

Promoted student participation in IEEE CS awards and scholarships.

Region 8

Co-Chair — IEEE PES Day

2025 – 2026

Organized local awareness initiatives focusing on sustainable energy.

IEEE

Executive Board Member — WIE ACT 3.0

2024

Overseeing event logistics and strategic event planning.

ESPRIT

Secretary — IEEE WIE ESPRIT SAG

2024

Documentation management and day-to-day operational coordination.

ESPRIT

Team Lead — IEEE Day Ambassadors Tunisia

2023

Spearheaded nationwide IEEE Day activities and coordination.

Tunisia

Ambassador Coordinator — Hack4IOT

2022 – 2023

Managed student ambassadors and coordinated event programming timelines.

ISTIC

Founder — IEEE WIE ISTIC SAG

2022

Established the local Women in Engineering student affinity group.

ISTIC
